**Application No.:** 10/621,286  
**Office Action Dated:** February 9, 2006

**PATENT**

## **REMARKS**

### **Interview Summary**

An interview was held on May 16, 2006 with Patent Examiner Zachary Pape, Supervisory Patent Examiner Lynn Field, and the undersigned Applicant's representative. During that conversation, Applicant's representative discussed the invention and how it differed from the cited art. The Examiner's generously informed Applicant's representative that they would consider the arguments. On May 23, 2006, Examiner Pape informed Applicant's representative that the amendment dated April 7, 2006 will no longer be considered new matter and that the cited reference, U.S. Patent No. 6,538,880 to Kamijo et al., is overcome by the arguments presented. Accordingly, Applicant's representative now submits the April 7, 2006 amendment and this Interview Summary as RCE submittals for continued examination of the present patent application.

Respectfully submitted,

Date: May 31, 2006
